AEROPLANE CRASH

AT LAKEWOOD

No scenic effect in the history of the theatre excels that of the sensational aeroplane crash in "The Broken Wing" which The Lakewood Players will present next week with a noteworthy cast.

The story of "The Broken Wing" is laid just over the Mexican border. An American scouting plane on a tour of observation runs into trouble, goes in a tail-spin and "cracks up" through the roof of a Mexican home. A young Mexican girl digs the American out of the debris and promptly falls in love with the stranger. This might have been a very pretty romantic story, but it happens that Captain Innocencio Dos Santos is in love with the girl, and the Captain is the ringleader of the bandit gang for which the aviator was looking. Thereby, does "The Broken Wing" become a dramatic international tangle with rebellion, secret service, romance and intrigue as its background.

"The Broken Wing" is an extraordinary play. Its action is swift, its love story is unusually romantic and its plot is colorful and vibrant with dramatic incidents. The Lakewood Players have brought nothing to their famous stage that matches it, and they will, as usual, do justice to it in casting and production. Maine playgoers are promised a real treat.

THE FOWLER RANGE OIL BURNER

THE FOWLER RANGE OIL BURNER has the following features, not found in other burners:

It is built for long life, the castings alone weighing approximately 26 pounds.

Has a 6 Gallon Galvanized Iron Tank; doing away with the small size, objectionable glass bottles.

Each burner is equipped with a brass carburetor to regulate the flow. This is not used on other burners, and absolutely does away with air pockets in the oil lines.

Lights without priming, and produces a high temperature flame very quickly.

The Fowler Range Oil Burner is built for long life. Compare its heavy castings, all brass fittings and needle valves with any other burner on the market, and judge for yourself the great difference in durability.
